

ASAP 340B

Working to Save America's 340B Program

The Alliance to Save America's 340B Program (ASAP 340B) is a partnership of Community Health Centers, patient, physician, and consumer advocates, and leaders from the biopharmaceutical industry working to ensure the 340B program supports true safety-net providers and the communities they serve.

We believe comprehensive reforms to the 340B program are needed to ensure it benefits patients and providers caring for underserved communities.

Ensure Direct Patient Benefit

Prevent Abuse by Middlemen

Verify the Program is Working

THE CONSEQUENCES OF INACTION ARE TOO SIGNIFICANT TO IGNORE

More than 31 million Americans are served by Community Health Centers. These providers and other safety-net clinics rely on the 340B program to help patients afford their medicines.

Greater accountability and transparency are needed urgently to ensure patients don't continue to get left behind. If we don't act now to modernize the 340B program, underserved communities will be left with fewer health care options, a lack of emergency and other services and overall lower quality of care.

ASAP 340B advocates for clear, practical, and achievable solutions to ensure the 340B program works in the interest of underserved patients and communities.

ASAP 340B POLICY PRINCIPLES

ASAP 340B supports an approach that includes the following policy principles:

- 1 Make 340B a true safety-net program for patients.**
- 2 Ensure 340B prescriptions are offered to patients at a discount.**
- 3 Update the 340B patient definition with strong safeguards.**
- 4 Establish clear criteria for 340B contract pharmacy arrangements to improve access.**
- 5 Prevent middlemen and for-profit entities from profiting off the 340B program.**
- 6 Update and strengthen 340B hospital eligibility requirements.**
- 7 Address standards for 340B child sites and subgrantee eligibility.**
- 8 Create a neutral 340B claims data clearinghouse.**
- 9 Facilitate public reporting on 340B program data.**
- 10 Establish enforceable rules and enhance federal administration and oversight of the 340B program.**

We urge policymakers to focus on all of these principles as they consider changes to realign the 340B program.
